

The 3D CAD software for jewelry creation

With over 20 years experience in developing Artistic CAD-CAM Software and more than 40,000 customers worldwide, Vision numeric has established its reputation among jewelers, watch makers and designers of luxury goods or fashion accessories. Customers feedback and constant monitoring of technological progress in software and machinery guide our developments.

With 3DESIGN you receive:

INNOVATIVE ...

PROFESSIONAL, DEDICATED, PRODUCTION ORIENTED

And LONG LASTING solutions!

Developed for you

Easy to use interface and ergonomic icons supports powerful and jewelry dedicated features and wizards. It reduces learning curve, while offering a creative environment to the designer.

Powerfully Associative

Thanks to the parametric technology, keep track of every step and parameters of your designs. Re-edit, modify, view your changes instantly, on one or multiple operations... even days later!

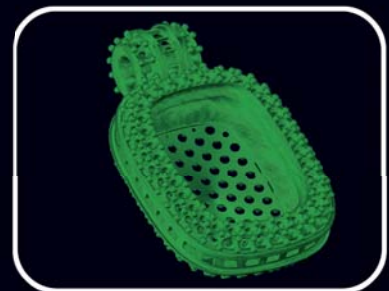

Design in 3D...

stage your creation...

and manufacture it.

Innovation and precision combined for excellence

Stay focused on creativity ! Build your models starting with a hand sketch and our Draft Kit function. Use the Catalogue components, import 3D artworks. Or freely model from scratch using professional Wizards, 2D to 3D Modeling, Special effects, Deformations tools, ...

3DESIGN has the complete collection of features to design efficiently, precisely and quickly.
The only "All-In-One" solution with Parametric Technology.

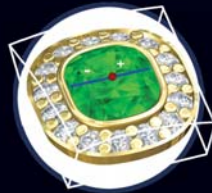

AND MUCH MORE LIKE...

Advanced pavé, ajour and prong placement

3D textures and bas-relief

Deformations and morphing

Stone Channel and rail builder

Catalog of components (incl. CRYSTALLIZED™ Swarovski)

Advanced rendering and Animation Studio

Create high quality photo realistic images, with textured backgrounds, advanced reflections, color lighting effects, watermarks. Also, instantly produce 3D animation files (Flash format), and share with your customers, on your website, in your store.
