

LAS VEGAS, NV, JULY 18, 2007 - Over 30,000 industry professionals visited the 2007's largest industry event over the course of four whirlwind days. This Woodworking Machinery and Supply Fair showcased the entire industry in the Las Vegas Convention Center.

Part of the 910 exhibiting companies, **Vision numeric USA** offered the latest technology for successful manufacturing businesses. RouterType was demonstrated with innovative new features and the Type3 technology.

High-speed CAD/CAM software solutions that are packed with advanced design and machining features allowing productivity increase for all types of design work.

Powerful and easy-to-use RouterType allow the design and manufacturing of all kinds of artistic engraving, woodcarving, serialization, sign making and 3D machining products.

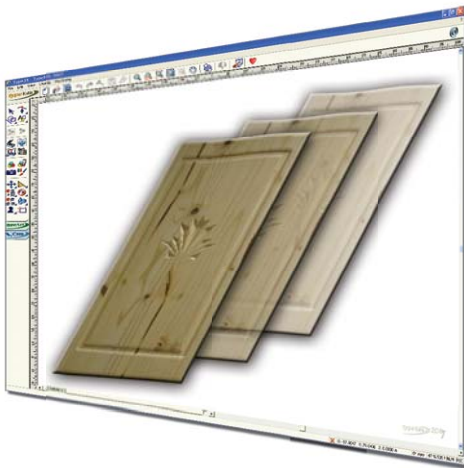

RouterType is famous for its unique parametric technology, still #1 in the CAD/CAM Industry.
